

## Partners in Complete Brain Injury Care

Serving the Triangle and surrounding area since 1990 with the largest and most comprehensive brain injury program – admitting over 200 brain injury survivors each year – WakeMed Rehabilitation is pleased to partner with Learning Services, Inc. to provide post-acute rehabilitation specialty therapies in the established Learning Services residential and community-based re-entry settings within the region.

For more than 25 years, Learning Services has maintained the core belief that integration of rehabilitation into all aspects of one's life is the key to exceptional progress and lasting gains. Setting the standard for post-acute neurorehabilitation, Learning Services provides brain injury services in home-like residential and community settings using best practices and essential program components that lead to the highest quality outcomes.

Carolina Rehab & Surgical Associates has served both WakeMed Rehab and Learning Services in medical direction and primary rehabilitation physician care for over 15 years and serves as a constant presence for the person served as they rehabilitate and move through the various levels of care.

This partnership facilitates an integrated continuum of care capable of providing rehabilitative services to brain injury survivors of all levels of acuity and severity – from the initial injury and early intervention in the emergency department, to acute interventions in WakeMed Neuro Critical Care and WakeMed Rehab's Neuro Care Unit (a specially designed unit for low-level brain injuries), to the WakeMed Rehabilitation Hospital, and now to rehabilitation programs in a residential, community re-entry focused environment. We have survivors covered

from A to Z with a continuum of care so comprehensive in nature, it encompasses every phase in the hospital setting, to every real-world post-acute setting.

Working together, Carolina Rehab & Surgical Associates, Learning Services and WakeMed Rehabilitation are unmatched in their ability to provide brain injury care. Additionally, in partnership, individuals living with a brain injury now have access to certified brain injury specialists intently focused on functional skills acquisition, individualized programming, community integration, productive activity and return to work skill development and structured transitional living opportunities. It is a partnership founded on achieving durable outcomes and designed to give each individual served the most comprehensive chance to get back to living their life as quickly as possible.
